

目次

理论探索

成渝中线高速铁路时速 400 km 关键技术创新研究谢 毅,黄艳磊,邱钰峻(1)

600 km/h 高速磁浮线路参数研究伍卫凡(7)

竖曲线与平面缓和曲线重叠设置研究柳世辉(13)

高速及超高速磁悬浮线路平面设计参数研究黄成名,鲍慧明,张继鹏,王英杰(17)

400 km/h 高速铁路通过能力计算方法研究黄辉林,周心怡,崔衍渠(23)

400 km/h 高速铁路小半径曲线地段橡胶浮置板轨道参数优化研究臧传臻(29)

既有 350 km/h 铁路运行更高速铁路线路平面参数适应性分析张逸飞(35)

关于利用既有铁路开行市域(郊)列车的探讨王 涛(41)

研究创新

复杂建设环境下基于 Hybrid A* 算法的铁路平面线形绿色优化设计
.....张天龙,何 庆,高 岩,高天赐,李子涵(47)

双碳经济下上海市海铁联运发展的环保效益分析徐佳毅(53)

面向铁路选线的全生命周期减碳效益估算方法宋洪锐,胥岚月,曾 勇(58)

世界首条永磁磁浮轨道交通试验线总体设计研究耿晓婷,李晓飞(63)

数字孪生在轨道交通智能建造业中的应用发展方 宜,卓建成,杜梦飞(68)

兰张高速铁路土地与新能源融合开发研究栗振坤(74)

绿色铁路实现途径探讨陈 丽,张可军,方 宜(79)

勘察设计

盐宜铁路油气田区域选线方法研究许朝帅,陈 丽,袁宏亮(83)

黄百铁路紫云高低站位线路方案多方法优选王彦虎(87)

云桂铁路总体设计及技术创新林晓龙,张可军,蒋登伟(93)

贵广铁路提速至 300 km/h 基础设施适应性分析李霞明,刘博诗,郭晓毅(98)

新建铁路引入成都枢纽方案研究刘博诗,祝志飞,张红伟,李 伟,丛 靖(103)

信息

《高速铁路技术》征稿启事

CONTENTS

Theoretical Exploration

Research on Innovation of Key Technologies of 400 km/h Middle Line of Chengdu-Chongqing High-speed Railway
..... XIE Yi, HUANG Yanlei, QIU Yujun (1)

Study on Track Parameters of 600 km/h High-speed Maglev WU Weifan (7)

Study on the Overlapping Arrangement of Vertical Curves and Plane Transition Curves LIU Shihui (13)

Study on Planar Design Parameters for High-speed and Ultra-high-speed Maglev Lines
..... HUANG Chengming, BAO Huiming, ZHANG Jipeng, WANG Yingjie (17)

Study on Calculation Method for Carrying Capacity of 400 km/h High-speed Railways
..... HUANG Huilin, ZHOU Xinyi, CUI Yanqu (23)

Study on Optimization of Track Parameters for Rubber Floating Slab in Small Radius Curved Section of 400 km/h
High-speed Railway ZANG Chuanzhen (29)

Adaptability Analysis of Line Planar Parameters for Existing 350 km/h High-speed Railways Operating at Higher Speeds
..... ZHANG Yifei (35)

Discussion on Utilizing Existing Railway Infrastructure for the Operation of Suburban Trains WANG Tao (41)

Research Innovation

Green Optimization Design of Railway Horizontal Alignment under Complex Construction Environment Based on
Hybrid A* Algorithm.....ZHANG Tianlong, HE Qing, GAO Yan, GAO Tianci, LI Zihan (47)

Analysis on Environmental Benefits of Developing Sea-rail Intermodal Transport in Shanghai within the Context of
“Dual Carbon” Economy XU Jiayi (53)

A Method for Estimating Full Life Cycle Carbon Reduction Benefit for Railway Route Selection
.....SONG Hongrui, XU Lanyue, ZENG Yong (58)

Study on Overall Design of the World’s First Permanent Maglev Rail Transit Test Line
..... GENG Xiaoting, LI Xiaofei (63)

Application and Development of Digital Twin in Intelligent Construction of Rail Transit
..... FANG Yi, ZHUO Jiancheng, DU Mengfei (68)

Study on Integrated Development of Land and New Energy for Lanzhou-Zhangye High-speed Railway..... LI Zhenkun (74)

Discussion on Approaches to Realizing Green Railways CHEN Li, ZHANG Kejun, FANG Yi (79)

Survey and Design

Research on Line Selection Methods for Oil and Gas Well Regions on Yancheng-Yixing High-speed Railway
..... XU Chaoshuai, CHEN Li, YUAN Hongliang (83)

Comparison between High and Low Station Positions for Ziyun Station of Huangtong-Baise Railway WANG Yanhu (87)

Overall Design and Technological Innovation of Nanning-Kunming High-speed Railway
..... LIN Xiaolong, ZHANG Kejun, JIANG Dengwei (93)

Analysis of Infrastructure Adaptability for Speeding Guiyang-Guangzhou High-speed Railway up to 300 km/h
..... LI Xiaming, LIU Boshi, GUO Xiaoyi (98)

Study on Scheme of Introducing a Railway into Chengdu Hub
..... LIU Boshi, ZHU Zhifei, ZHANG Hongwei, LI Wei, CONG Jing (103)
